

# WAVE

## WWave Hanging Baffles are a Unique High-Quality Class A Acoustic Absorber That Adds Interest To Your Acoustic Design.

Wave baffles are manufactured with an MTech foam core and a Blazer or Blazer Lite fabric finish. Wave can be suspended horizontally and vertically using The Acoustics Company corkscrew fixing kits. Baffles are excellent at battling reverberation and echo and should be suspended evenly at a distance of 300mm to maximise sound absorption.

## TECH SPECS

### STANDARD SIZE

1500mm X 300mm X 50mm

### STANDARD SHAPES

WAVE

### FIRE SPECIFICATION

DIN EN 13501-1:2010 C - s2, d0

### COMPOSITION

BASF BASOTECT G FOAM / FABRIC

### DENSITY

9KG/M3

### ACOUSTIC PERFORMANCE

CLASS A

### RECOMMENDED SPACING

We recommend a 300mm spacing from the ceiling and each other.
